

# **Employees' Equipment Repair Request and Management**

Ken Lorenz Sendaydiego  
BSCS3-2

### **Description**

- A special feature that embraces technology as one of the main factors for Human performance maintenance and blending in the HRM as a feedback feature specifically for maintaining equipments. With its goal of minimizing the effects of technological predicaments on mental health and performance, it consists of a quick-access web-based interface for requesting for either repair or upgrade of a company's property as well as including another interface for quick response and management, and inquiry.
